

How to Register on the Project Website

How to Register on the Project Website

Now that you're familiar with the curriculum and the strategy for implementation, and have involved your school administration, teachers, and students, it's time to register for the project. Registration is important for helping us track the progress of the project, gather information about the schools involved, and monitor the number of students participating. Additionally, this registration process enables us to collect valuable data that will help assess the impact of the project and continually improve our learning offerings.

How to Register on the Project Website

STEPS TO REGISTER

1

Go to the [CHANGE Environment Project Website](#) and locate the teacher registration form (at the end of the curriculum page).

2

Fill out the form with your details, and if you don't find your school listed, select "Other" under the school's name field and manually input your school's name.

3

Submit the registration.

4

After you complete the registration, you will receive an email containing:

- A list of unique codes corresponding to the number of students you indicated in the registration form.
- Two evaluation links for pre- and post-project assessment.

Important Notes:

Student Codes:

Once you receive the list of student codes, assign a unique code to each student. It's important to keep track of which student receives which code. We recommend printing the list of codes and associating them with each student. This process ensures anonymity and protects student data.

Evaluation Process:

The first evaluation should be completed before beginning the implementation of the stages with students.

The second evaluation should be completed after finishing all stages of the project.

By registering, you're helping us measure the success and reach of the project and ensuring that we can continue improving the curriculum based on feedback and data.
