the European Union

Why Teacher Registration is important?

This registration form is essential for tracking the progress of the initiative, gathering key information about the schools involved, and monitoring student participation. By registering, you help us collect valuable data that allows us to assess the project's impact and continuously improve our educational offerings.

What to expect after registering?

Once you register, you will receive an email containing the following information:

Student Codes

You will receive a list of unique student codes. Please assign a code to each student and keep track of their assigned codes. We recommend printing the list and securely associating each code with a student while maintaining anonymity. This ensures data protection and confidentiality.

Evaluation Process

- The first evaluation should be completed before starting the implementation of the project stages with students.
- The second evaluation should be completed after all project stages have been completed.

Note

After the project ends, we will no longer collect data on its impact. However, we will continue to track how many teachers are using the materials to understand our long-term reach. If you prefer to use the materials without registering, that is absolutely fine. If you need any support or further information, feel free to contact us at <https://jrschange.org/contact/>. Thank you for your support!
